

# ADVANCED FRUIT GROWING

## Contents

Origin of fruit species	4
Intensification of fruit growing	6
Ecological fruit production	11
Integrated fruit production	14
Current aspects addressed in intensive plantings	16
The importance of fruit set regulation	16
The present phenomenon: natural elements	24
Effect of climate change on mild climate zone fruits	33
Establishment costs for intensive fruit orchard	36
Crowing technologies for the production of individual fruit species	40
Production technologies of apples	40
Production technologies of pears	45
Production technologies of plums	48
Production technologies of apricots	51
Production technologies of peaches	55
Production technologies of sweet cherries	58
Production technologies of sour cherries	62
Production technologies of berry fruit	64
Production technologies of shell fruit	71
Production technologies of less known fruit species	73
