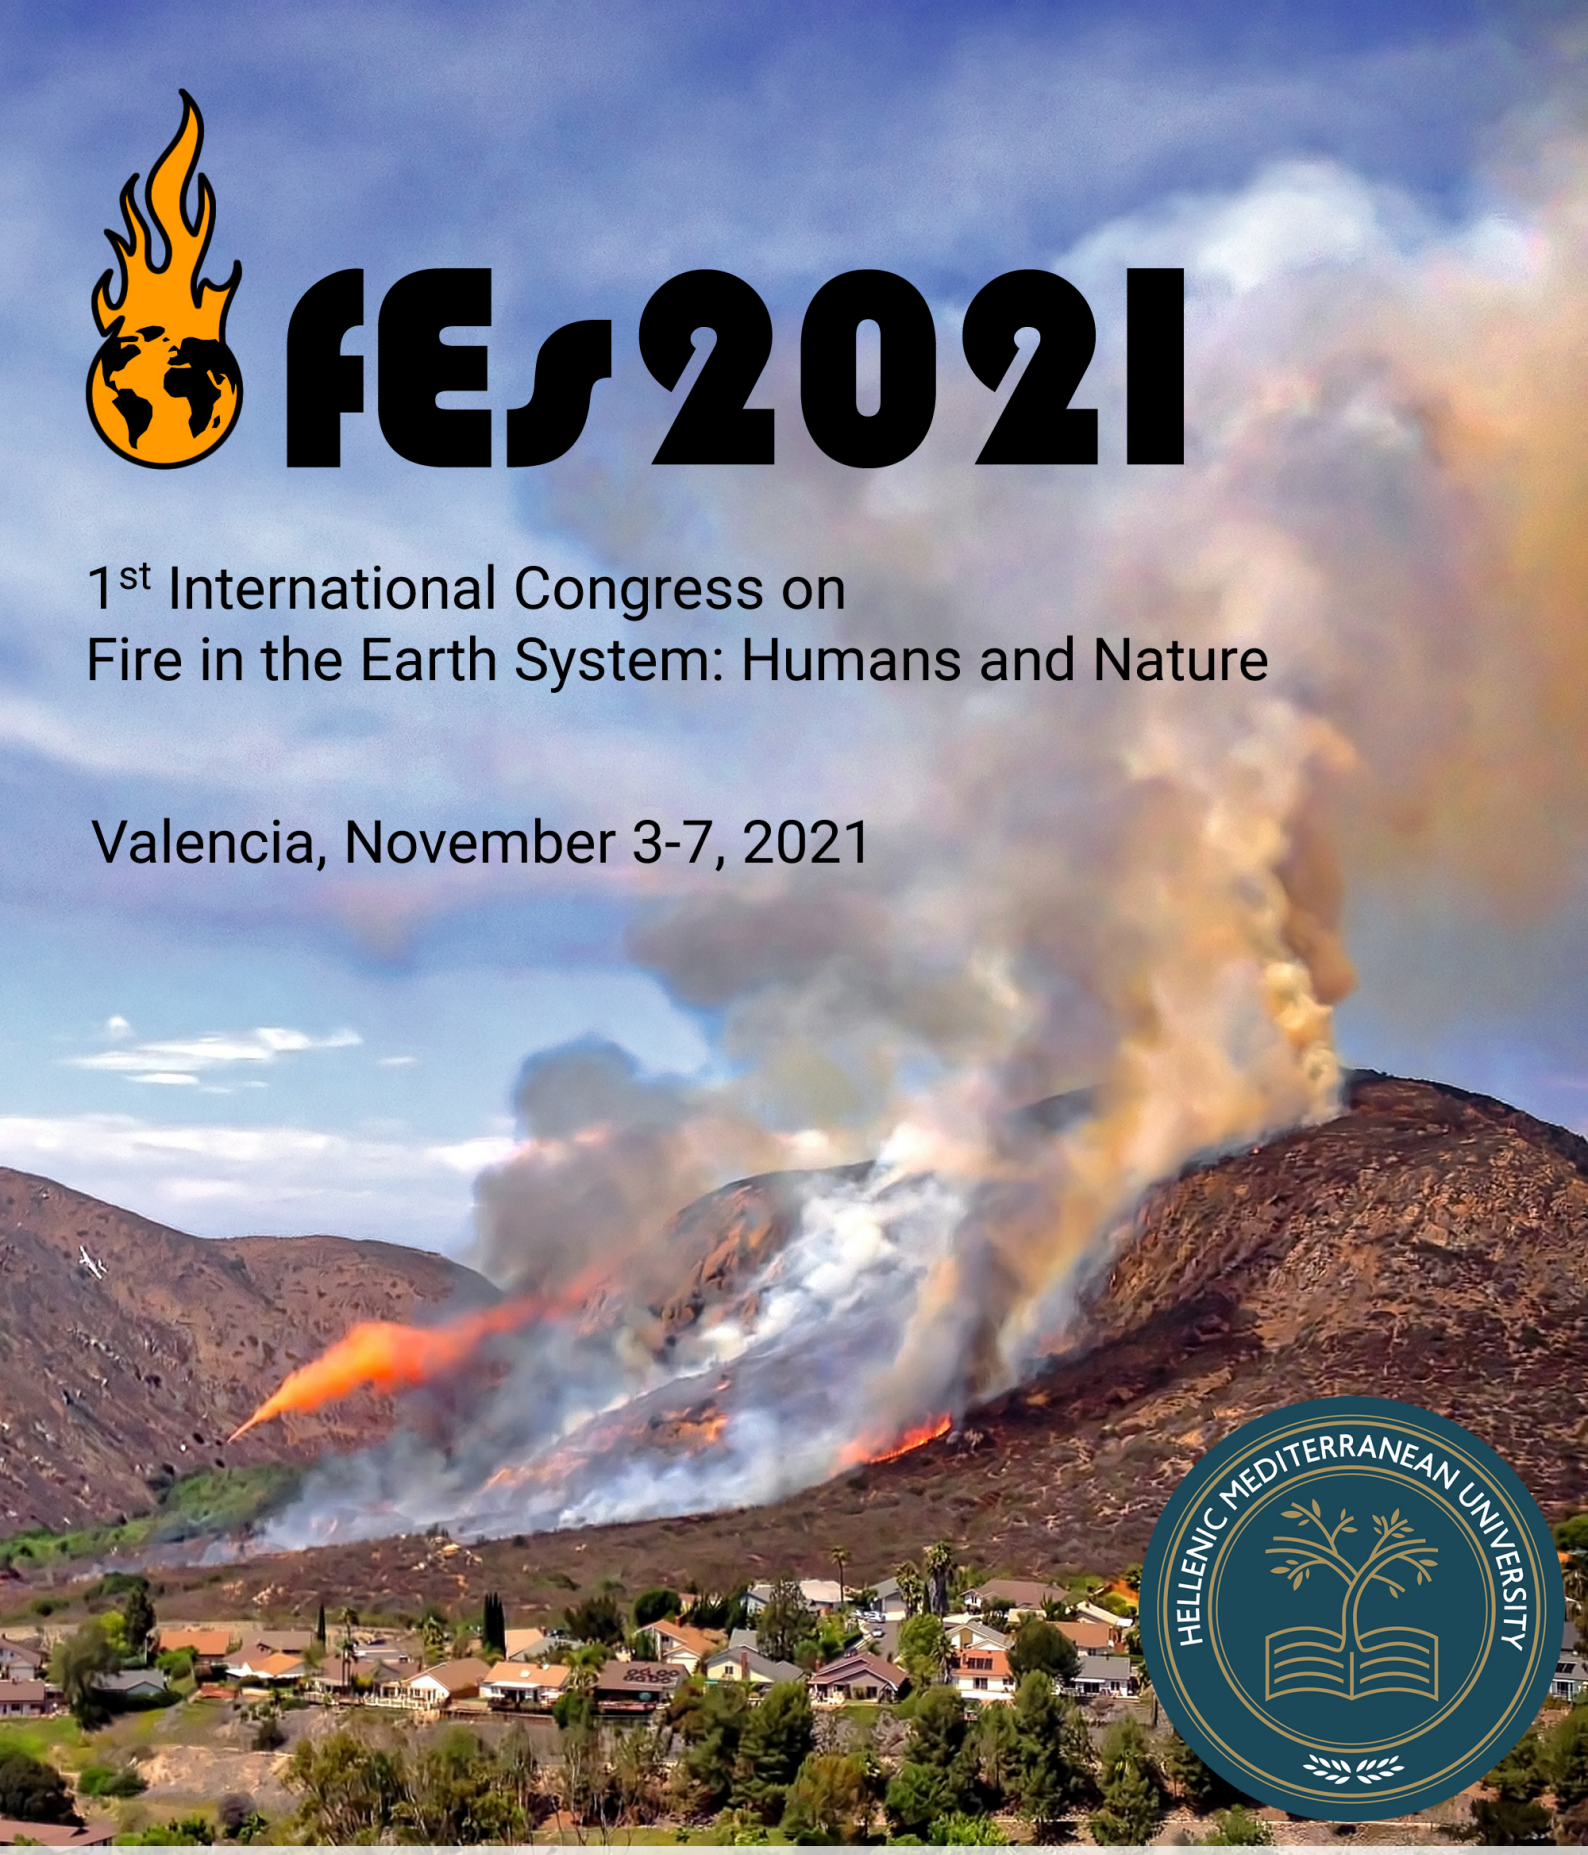
fEs2021

1st International Congress on
Fire in the Earth System: Humans and Nature

Valencia, November 3-7, 2021



HELLENIC MEDITERRANEAN UNIVERSITY

Department of Agriculture
HELLENIC MEDITERRANEAN UNIVERSITY

VNIVERSITAT DE VALÈNCIA
Fac. Geografia i Història

VNIVERSITAT DE VALÈNCIA
Departament de Geografia

SEDER

UNIVERSIDAD DE GRANADA

GENERALITAT VALENCIANA
Conselleria d'Innovació, Universitats, Ciència i Societat Digital

ADENE en defensa de la naturaleza

BOSC VIU
Plataforma per la defensa dels ecosistemes forestals valencians

AUTOCARES P. PUERTO-ANJUSA
Tus viajes a medida

Table of Contents

The Mission of fEs2021 1
Scientific Committee 3
Organizing Committee 5
Keynote speakers 7
Conference Program 13
Forest fires today. A scientific and societal challenge 15
Fire in the Earth System: Science & Society, FIRElinks EU COST action challenges 16
Is enough water supplies for extinguishing forest fires in the Czech Republic? 17
Slow emergency stabilization: limitations for the recovery of burned areas in Portuguese forests 18
Acacias Control: a tool to reduce wildfires risk in unmanaged forestlands 20
DISRUPTED LANDSCAPES: The representation of Mediterranean Wildfires 22
SDGs and Wildfires: the role of soils in Sustainable fire management 23
Fire Cube: Understanding and Communicating the Multidimensionality of Fire 24
Politics of Pixels: Role of Satellite Remote Sensing in Shaping and Sustaining Fire Suppression Policy in India 26
Slash pile burning like a forest fire initiator 27
Cost-benefit comparison between fire prevention and no fire prevention scenarios: pilot analysis applied to a case study in Sardinia, Italy 28
Recovering shrub biowaste involved in wildland fires in the South of Europe through torrefaction mobile units 29
Evaluation of soil profiles to understand resilience in natural and anthropogenic environments after different number of wildfires 31
Assessment and mapping the habitats' vulnerability to forest fires in "Rila Monastery" Natura 2000 zone (Bulgaria) 32
Forest fires risk assessment in "Yulen" Reserve in "Pirin" National Park, Bulgaria 33
Fire geographies in Sardinian landscapes: a place-name based approach. 34
Multi-decadal increase of forest burned area in Australia linked to climate change 35
Service-Learning projects to educate young generations in fighting wildfires 36
Fire and soil organic matter: relationships, impacts and novel methodologies 38
Changes in Soil Organic Carbon Pools during Long-Term Post-Fire Succession in the Khibiny Mountain Tundra Heaths 39
UAS-bared near infrared imagery as a new fire severity metric 40
Dynamics of topsoil properties after a fire: small scale straw burning experiment 41
Application of Geostatistical Analysis with R Machine Learning Methodologies for Soil Organic Carbon Mapping 42
Wildfire effects on different soil organic carbon pools in Mediterranean pine forests 43
Laboratory Study of Smouldering Peat with Samples from Peatlands in Flow Country, Scotland 44
Soil water infiltration in the Pinet forest fire. The ephemeral impact of ash.

..... 46
Fire legacy on dissolved organic matter (DOM) and soil properties along a fire severity gradient in two Eucalyptus ecosystems in South Western Australia 48
Application of vis-NIR spectroscopy for estimation of SOC and SOC fractions on soil samples burned under different laboratory conditions 49
Fire effects on soil biota 51
Resistance and resilience of bacterial communities against large wildfires in heathlands ecosystems 52
Alteration of soil properties by high intensity controlled burning in southern Spain 54
The effect of different fire temperatures on the water repellency parameters of forest soil under different types of vegetation 56
Soil prokaryote community structure and C and N related biological conditions following fires in Mediterranean native forest of central Chile 57
Fire history modulate soil biogeochemistry and microbial community in Pinus pinaster forests of central Spain 59
Effects of different fire severity on soil biogeochemistry and related feedbacks on Quercus ilex L. ecophysiological status 61
Vegetation cover and physiognomy effects on C and N in frequently burnt and unburnt soils in an African savanna 62
Climate-fire links 63
Future Climate Change Impact on Wildfire Danger over the Mediterranean: the case of Greece 64
Predicting the extension of the area burnt by forest fires in Italy by means of drought indicators 66
Climate Drivers of Fire Activity: a Global Assessment 67
Climate drivers of wildfire activity in the Mediterranean 68
Seasonal variations of electrical signals of Pinus halepensis Mill. in Mediterranean forests in dependence on climatic conditions 69
Fires at the Wildland-Urban-Interface 71
Integrated Wildland-Urban Interface Fire Management: the case study of Riba-Roja de Túria and Paterna municipalities 72
Evaluation and prognosis of resilient landscapes to wildfires. The urban-rural interfaces of the Metropolitan Area of Concepción as Socio Ecological Systems (SES). 74
A full-scale method to classify flammability of wildland-urban interface vegetation 75
Performance-Based Design methodology for the evaluation of WUI microscale fire hazards 76
Thermogravimetric and Differential Thermal Analysis of Sea Buckthorn from The Netherlands Compared to Common US Shrubs in Fire-Prone Ecosystems 78
Building Damage at the Wildland-Urban Interface: Case Studies California, USA and Pedrógão Grande, Portugal 79
Assessment of the vulnerability of the wildland-urban interface (WUI) in the Valencian Region as a basis for the calculation of the fire severity index. 81
Historical Human System Drivers of Wildland Urban Interface Fire Risk in Spain: A Coupled Human Natural Systems Approach 82
Investigating Conifer Tree Flame Spread Under an Applied Wind Field 83
Case study on a performance-based approach to wildland-urban interface (WUI) fires 84
Fire Behavior Modelling and Simulations 85

Global sensitivity of burned area to lightning 86
Species climatic niche explains post-fire regeneration of Pinus halepensis under compounded effects of fire and drought 87
High-resolution smoke emissions from the 2017 extreme wildfires in Portugal 88
Decision Support System for Effective Fuel Management 90
Characterizing the lifetime phases of wildland fires from the Sioux Lookout District in Ontario, Canada by utilizing mixed effects multi-state modelling techniques 92
PhyFire, an online wildfire simulation tool 93
Semi-natural studies of a wildfire impact on air transport processes 95
Fire-spotting generated fires: macro- and meso-scales effects 96
When the unpredictable comes: An approach for foreseeing the transition to chaos in wildfire propagation 98
Temporal evolution of a wildland flame envelope: An experimental study on litter fires 100
Brazil on fire: is climate the culprit? 101
A GIS-based cellular automata model to simulate field-scale flaming and smouldering wildfires on peatlands 103
Terrain metrics: Directional roughness for forest fire risk mapping 105
The importance of savanna fires in the global carbon cycle: beyond direct emissions 106
Influence of different sample holders on the flammability of pine needles in the mass loss calorimeter 107
Artificial Intelligence (AI) and Machine Learning (ML) for wildfires 109
Predicting wildland fire propagation using deep learning 110
Wildfires detection and segmentation using deep Convolutional Neural Networks and Tranformers 112
Change Detection Analysis Using Sentinel 2 Multi-Temporal Satellite Imagery and its Integration for Fuel Mapping at a Municipal Scale 114
ETHON: unmanned aircraft for forest fire management 115
Evaluating and comparing statistical and machine learning methods for fire occurrence prediction 116
Contrasting patterns and interpretations between fire spread simulators and machine learning models when mapping burn probability 118
Wildfires and Civil Protection 119
Using unmanned aerial vehicles to assist prescribed fires and detect rekindles in wildfire management 120
How to Strengthen the Capabilities of Portuguese Civil Protection. Preliminary results of the RECIPE project study. 122
Remote Sensing Solutions for an Efficient Support of Forest Fire Management Phases 124
Post-fire restoration management: Effects on soil, vegetation and geomorphology 126
Evolution of Vegetation on the Left Bank of the River Unzha (Kostroma Region, Russia) after the Fire of 1972 - Results of 30 Years of Observation 127
Burn severity and plant regenerative traits modulate vegetation response in different fire-prone Mediterranean ecosystems of the Iberian Peninsula 128
Evaluation of soil burn severity using very high spatial resolution products from Unmanned Aerial Vehicles (UAV) 130
Micromorphological changes in soil affected by a prescribed burn: the Sierra de Manantlán case, Jalisco, México. 132
Analysis of vegetation regeneration after a wildfire in Portugal using the Google

Earth Engine (GEE) platform 133
Long-term erosion and the impact of wildfires: two different approaches. 135
Spatial-temporal variability of vegetation regrowth and topsoil elements after prescribed fire in the pre-mountain area (Croatia) 137
Modelling Forest Fire and Post-Fire Mitigation Measures: Impacts on sediment yield 138
TERRAMATER project: A tool for post-fire rehabilitation and restoration of soils 139
Prescribed fire and soil mulching with fern in Mediterranean forests: Effects on surface runoff and erosion 141
Short-term hydrological response of soil after wildfire in a semi-arid landscape covered by Macrochloa tenacissima (L.) Kunth 142
Effect of fire on the composition of flowering plants and the abundance of pollinators in a Mediterranean ecosystem 143
Evaluating the potential of prescribed burning for the biodiversity conservation of European grasslands 144
Fire on the screen: media, cinema and video-storytelling 145
'Firestorm', beyond the attraction for devastation: Context, scientific information and emotion to shape a compelling multimedia story 146
Improving Wildfire TV Coverage: Lessons from a Spanish summer (2021) 148
Disinformation Analysis on Wildfires Through Fact-Checking Verification in Spain 150
Round table with filmmakers and media professionals 152
Takes two to tango: Making sense of the California 2020 wildfire season Trump-Newsom political blame game 153
Round table with filmmakers and media professionals 155
Conference tours 158
Index 163
