1	Introduction into Ergonomy	5
2	Definition and Goals of Ergonomics	8
3	Development of Ergonomics	10
4	Basic Terms	13
5	Factors Influencing Ergonomics of the Environment	15
5.1	Anthropometry	15
5.1.1	The History of Anthropometry and Human Measuring	16
5.1.2	Anthropometric Dimensions	22
5.1.3	Key Findings from Anthropometric Measurements	26
5.1.4	Human Body Construction, Spine	28
5.2	Working Positions	34
5.3	Standing and Working in a Standing Position	35
5.3.1	Standing and the Most Common Posture Disorders, Influence on the Body	36
5.3.2	Ergonomic Requirements for Working at a Standing Position	37
5.3.3	Sitting and Working in a Sitting Position	39
5.3.4	Basic Requirements for Chair Ergonomics	41
5.3.5	Dimensional Requirements for Seating Furniture	46
5.4	Alternative Sitting	55
5.4.1	Kneeling Chair	57
5.4.2	Balance Ball	61
5.4.3	Support for Work While Standing	61
5.5	Sitting and Working with a Computer	63
5.6	Health Aspects of Working with a Computer	63
5.6.1	Ergonomic Requirements for Working with a Computer	67
5.6.2	Requirements for Computer Equipment	69
5.6.3	Lighting, Noise and Air	70
5.6.4	Work Regime	71
5.7	Ergonomics for Disabled Persons	71
5.7.1	Requirements for the Sitting Position of Persons with Disabilities	72
5.7.2	Room for Disabled People	76
5.7.3	Construction and Interior Requirements	80
5.8	Noise, Light, Heat Factors	84

## Ergonomics and Space

5.8.1	Infrasound	85
5.8.2	Ultrasound	86
5.8.3	Lighting and Visual Stress	88
5.8.4	Lighting Conditions and Age	89
5.8.5	Thermal Comfort of Interior Environments	91
5.9	Colour Perception	93
5.9.1	Colour As a Symbol	94
5.9.2	Colours from a Physical Point of View	95
5.9.3	Physiology and Colour	95
5.9.4	Colour and Its Perception	98
5.10	Psychology, Sociology	104
6	Steps Taken by an Ergonomist When Addressing an Issue	106
7	The Most Important Criteria and Parameters of Ergonomic Evaluation	107
8	Conclusion	114
	The Most Important Legislative Documents Related to Ergonomics	115
	References	118
