<b>1 Pond management</b> .....	<b>8</b>
1.1 Ponds - history and characteristics .....	8
1.1.1 Technical pond facilities .....	9
1.1.2 Classification of ponds .....	13
1.1.3 Pond bottom .....	16
1.2 Essence of the pond production .....	17
1.2.1 Food chains.....	17
1.2.2 Nutrient cycle .....	18
1.2.3 Energy flow .....	19
1.2.4 Biological productivity and production .....	20
1.3 Methods of pond farming .....	20
1.3.1 Labelling the farmed fish.....	21
1.3.2 Intensity of fish farming.....	21
<b>2 Carp culture</b> .....	<b>23</b>
2.1 Origin and distribution of the carp.....	23
2.2 Characteristics of the carp.....	24
2.3 Reproduction .....	29
2.3.1 Mass spawning (the old Bohemian method) .....	29
2.3.2 Group spawning (the method of Jan Dubravius).....	30
2.3.3 Artificial stripping .....	31
2.3.4 Controlled reproduction .....	34
2.4 Carp rearing .....	37
2.4.1 Fingerling rearing ( $K_0 \Rightarrow K_1$ ) .....	37
2.4.1.1 Method of rearing in fingerling pre-ponds and consequently in fingerling ponds (including depletion of fish) ( $K_0 \Rightarrow K_r \Rightarrow K_1$ ).....	39
2.4.1.2 The rearing method without fishing out ( $K_0 \Rightarrow K_1$ ) .....	40
2.4.1.3 Method of rearing in special cultural units ( $K_0 \Rightarrow K_k$ ).....	41
2.4.2 Rearing the larger fry ( $K_1 \Rightarrow K_2$ ) .....	42
2.4.3 Marketable carp rearing ( $K_2 \Rightarrow K_3$ ).....	43

# Content

2.5	Methods of the pond fishing .....	44
2.5.1	Pond fishing in the fishing pit.....	45
2.5.2	Pond fishing in the under-dam pit.....	47
2.5.3	Summer intermediate fishing.....	47
2.6	Wintering of fish .....	48
2.6.1	Wintering ponds .....	48
2.6.2	Maintenance of wintering ponds.....	51
2.6.3	The fish stocks of the wintering ponds .....	52
2.6.4	When fish are raised .....	53
2.6.5	Fishing of the wintering ponds.....	54
2.7	Fish stocks .....	55
2.7.1	Calculation of the base monocultural fish stock .....	56
2.7.2	Calculation of the dense monocultural fish stock .....	58
2.7.3	Calculation of the combined maximum amount of fish in the pond.....	60
2.7.4	Calculation of the polycultural fish stock .....	61
<b>3</b>	<b>Nutrition of fish .....</b>	<b>63</b>
3.1	Introduction to the nutrition of fish .....	63
3.2	Food intake, digestion and efficiency of the feed material .....	64
3.2.1	Ingestion.....	65
3.2.2	Digestion, absorption and transport of nutrients .....	66
3.2.3	Excretion.....	69
3.2.4	Nutrient metabolism.....	69
3.3	Characteristics of the natural food of fish .....	74
3.4	Nutritional requirements of fish.....	76
3.4.1	Energy requirements.....	76
3.4.2	Protein requirements .....	78
3.4.3	Fat requirements.....	80
3.4.4	Saccharides requirements.....	82
3.4.5	Mineral substances and vitamins requirements .....	82
3.5	Choice and characteristics of the feeds for fish .....	83
3.5.1	Protein plant-based feeds .....	83
3.5.2	Saccharide plant-based feeds .....	84
3.5.3	Animal feeds .....	86
3.6	Treatment of the feeds.....	88
3.7	Supplementary feeding technique.....	94
3.8	Assessment of the feeds efficiency .....	96
3.9	Application and storage of feeds.....	97

# Content

3.91 Fish feeders .....	97
3.92 Storage of feeds .....	97
<b>4 Trout culture .....</b>	<b>102</b>
4.1 Rearing systems.....	102
4.1.1 Cage systems.....	102
4.1.2 Semi-flow-through systems .....	103
4.1.3 Flow-through systems.....	103
4.1.4 Recirculating systems.....	104
4.2 Rearing facilities.....	104
4.2.1 Net Cages .....	104
4.2.2 Ground ponds .....	105
4.2.3 Concrete pools (canals) .....	106
4.2.4 Plastic troughs and tanks.....	107
4.2.5 Circular tanks.....	108
<b>5 Rearing.....</b>	<b>110</b>
5.1 Characteristics of the individual reared fish species.....	110
5.1.1 Brown trout ( <i>Salmo trutta morpha fario</i> LINNAEUS, 1758) .....	110
5.1.2 Brook trout ( <i>Salvelinus fontinalis</i> MITCHILL, 1815) .....	112
5.1.3 Rainbow trout ( <i>Oncorhynchus mykiss</i> WALBAUM, 1792).....	113
5.1.4 Danube salmon, the huchen ( <i>Hucho hucho</i> LINNAEUS, 1758).....	114
5.1.5 European grayling, the grayling ( <i>Thymallus thymallus</i> LINNAEUS, 1758).....	115
5.2 Demands on the quality of water.....	116
5.3 Reproduction .....	119
5.4 Incubation of eggs and hatching of the fry.....	121
5.5 Rearing the fry.....	125
5.5.1 Initial feeding of the fry (first phase) .....	125
5.5.2 Feeding the fry (second phase) .....	126
5.6 Rearing the year-olds .....	128
5.6.1 Rearing in small earthen ponds .....	128
5.6.2 Rearing in concrete pools (canals) .....	128
5.6.3 Rearing in net cages .....	129
5.6.4 Rearing in circular tanks.....	129
5.7 Production of the marketable fish.....	129
5.7.1 Rearing in concrete pools (canals) .....	130
5.7.2 Rearing in earthen ponds.....	130
5.7.3 Rearing in net cages.....	130
