

# Obsah

Introduction.....	7
<b>1 Plant-Microbe Interactions and Its Effect on Crop Productivity .....</b>	<b>9</b>
<b>1.1 Different Types of Plant-Microbe Interactions.....</b>	<b>9</b>
1.1.1 Mutualism .....	9
1.1.2 Commensalism .....	10
1.1.3 Amensalism .....	10
1.1.4 Symbiosis .....	10
1.1.5 Pathogenic Interaction .....	10
<b>1.2 Mechanisms of Plant-Microbe Interaction .....</b>	<b>10</b>
1.2.1 Through Root Exudates.....	10
1.2.2 Positive Plant-Microbe Interaction Mediated by Root Exudates .....	11
1.2.3 Negative Plant-Microbe Interaction .....	12
<b>1.3 Beneficial/Positive Interactions to Increase Plant Productivity .....</b>	<b>14</b>
1.3.1 Nitrogen Fixation.....	14
1.3.2 Phosphate Solubilization .....	15
1.3.3 Inorganic phosphate solubilization by PSM.....	15
1.3.4 Organic phosphorus mineralization by PSM .....	15
1.3.5 Biofertilizers .....	16
1.3.6 Biopesticides.....	18
1.3.7 Phytostimulants .....	19
<b>1.4 Plant-Microbe Interactions in Protecting Against Biotic Stresses .....</b>	<b>20</b>
<b>1.5 Plant-Microbe Interactions in Protecting Against Abiotic Stress .....</b>	<b>21</b>
1.5.1 Water .....	21
1.5.2 Temperature.....	22
1.5.3 Heavy Metal.....	23
<b>1.6 Utilization of Arbuscular Mycorrhizal Fungi in Horticulture .....</b>	<b>24</b>
1.6.1 The Range of Symbiotic Plants .....	25
1.6.2 Taxonomy of Arbuscular Mycorrhizal Fungi.....	25
1.6.3 The Role of AM Fungi in the Management of Plant Diseases.....	25
1.6.4 Arbuscular Mycorrhizal Fungi's Mode of Action .....	27
<b>1.7 Plant growth-promoting microorganisms as biocontrol agents of plant diseases.....</b>	<b>28</b>
1.7.1 Mechanisms, challenges and future perspectives.....	28
1.7.2 PGPR as promising biocontrol agents.....	29
1.7.3 Biocontrol mechanisms using PGPR.....	30
1.7.4 Challenges of employing PGPR as BCAs .....	31
1.7.5 Rhizobacteria as BCAs.....	33
1.7.6 Fungi as BCAs.....	34
1.7.7 Mechanisms used by MBCAs.....	36
1.7.8 Competition in the rhizosphere.....	37
1.7.9 Future perspectives .....	38
<b>2 The most important pathogens of plants.....</b>	<b>39</b>
<b>2.1 Bacterial pathogens of plants.....</b>	<b>39</b>
<b>2.2 Fungal pathogens of plant.....</b>	<b>50</b>
<b>2.3 The most important viruses .....</b>	<b>60</b>

<b>3</b>	<b>Biological Control of Plant Diseases by Natural and Genetically Engineered</b>	<b>71</b>
3.1	Fluorescent <i>Pseudomonas</i> spp.....	71
3.2	Rhizosphere as a microhabitat.....	71
3.3	Genetic characterization of pseudomonads .....	74
3.4	Ecological aspects of pseudomonads in the rhizosphere.....	75
<b>4</b>	<b>Microbial Control of Postharvest Diseases of Fruits and Vegetables .....</b>	<b>82</b>
4.1	Natural microbial antagonists .....	83
4.2	Artificially introduced microbial antagonists.....	83
4.3	Mode of action of microbial antagonists .....	86
4.4	Introduction of microbial antagonists .....	90
4.5	Criteria for an ideal antagonist.....	91
4.6	Antagonistic preparations .....	91
4.7	Yeast: As potential microbial antagonists.....	92
4.8	Application methods for microbial antagonists .....	92
4.9	Enhancing the bioefficacy of microbial antagonists.....	94
4.10	The Microbiology of Minimally Processed Fresh Fruits and Vegetables .....	98
<b>5</b>	<b>Nature of microorganisms in MPF fruits and vegetables .....</b>	<b>99</b>
5.1	Microbial Contamination .....	99
5.2	Pectinolytic Microorganisms .....	100
5.3	Foodborne Pathogens in MPF Vegetables .....	100
5.4	Origin of microbiota on MPF fruits and vegetables.....	101
5.4.1	Unprocessed Vegetables.....	101
5.4.2	Processing.....	103
5.5	Effect of microorganisms on the quality of MPF fruits and vegetables .....	104
5.6	Control of Refrigeration .....	116
<b>6</b>	<b>Potatoes and Potato Products .....</b>	<b>117</b>
6.1	Microbiology of potatoes and potato products .....	119
6.2	Foodborne illness outbreaks associated with potatoes and potato products .....	124
6.3	Microbial challenge studies using potatoes and potato products.....	126
<b>7</b>	<b>Post Harvest Microbial Biotechnology of Tropical Root and Tuber Crops</b>	<b>133</b>
7.1	Microbial Control Strategies .....	134
7.2	Fungi .....	135
7.3	Yeast.....	136
7.4	Bacteria.....	136

<b>7.5</b>	<b>Fields of Use for Bacterial Antagonists .....</b>	<b>139</b>
<b>7.6</b>	<b>Measures to Improve Performance of Antagonists .....</b>	<b>140</b>
<b>7.7</b>	<b>Temperate Root Crops .....</b>	<b>141</b>
7.7.1	Potato .....	141
7.7.2	Sugar Beet.....	143
7.7.3	Carrot.....	146
7.7.4	Onion .....	146
7.7.5	Ginger .....	146
7.7.6	Garlic .....	147
<b>7.8</b>	<b>Tropical Tuber Crops .....</b>	<b>147</b>
7.8.1	Cassava.....	147
7.8.2	Yam.....	148
7.8.3	Cocoyams.....	149
7.8.4	Sweet Potato .....	150
<b>8</b>	<b>Cassava Fermentation in Latin America: Fermented Starch and Flour ....</b>	<b>150</b>
<b>8.1</b>	<b>Main cassava fermented food technology in Africa .....</b>	<b>151</b>
8.1.1	Cassava fermented food in East Africa .....	151
8.1.2	Cassava fermented food in Central Africa .....	153
8.1.3	Cassava fermented food in West Africa .....	154
<b>8.2</b>	<b>Microorganisms associates with cassava fermented food in Africa .....</b>	<b>157</b>
<b>8.3</b>	<b>Role and function of fermentation on cassava food .....</b>	<b>160</b>
<b>9</b>	<b>Mushroom Diseases and Their Management .....</b>	<b>164</b>
<b>9.1</b>	<b>Fungal diseases .....</b>	<b>168</b>
<b>9.2</b>	<b>Bacterial diseases.....</b>	<b>171</b>
<b>9.3</b>	<b>Viral diseases .....</b>	<b>173</b>
<b>10</b>	<b>Fermentation of wine from tropical and subtropical fruits.....</b>	<b>177</b>
<b>10.1</b>	<b>Wine Making Technology .....</b>	<b>181</b>
<b>10.2</b>	<b>Wines from tropical and subtropical fruits.....</b>	<b>181</b>
<b>11</b>	<b>Fruit-Based Fermented Beverages.....</b>	<b>187</b>
<b>11.1</b>	<b>Microbiological Risks Found in Fruit-Based Fermented Beverages .....</b>	<b>190</b>
<b>11.2</b>	<b>Chemical Risks Found in Fruit-Based Fermented Beverages.....</b>	<b>191</b>
<b>11.3</b>	<b>Microplastics Detected in Fruit-Based Fermented Beverages .....</b>	<b>198</b>
<b>11.4</b>	<b>Techniques Applied for Limiting Formation and Contaminants Removal.....</b>	<b>199</b>
<b>12</b>	<b>Biotechnological potential of coffee pulp and coffee husk for bioprocesses .....</b>	<b>203</b>
<b>12.1</b>	<b>Coffee.....</b>	<b>203</b>
12.1.1	Industrial processing of coffee cherries .....	204
12.1.2	Natural microbiota isolated from coffee pulp/husk .....	205
12.1.3	Bioprocesses involving coffee pulp and husk.....	205
12.1.4	Products and applications .....	206
<b>13</b>	<b>Cocoa and coffee fermentations .....</b>	<b>211</b>
<b>13.1</b>	<b>Cocoa fermentation process .....</b>	<b>212</b>
